# PROJECT BLOSSOM

METHODOLOGY PROPOSAL

# PROJECT BLOSSOM

---

**A new concept of  
education for the  
co-creators of  
tomorrow**

# Problem

---

## What problems do we solve?

With the new normality paradigm, there appears a new ecosystem that endangers childrens spiritual growth, and their mental and physical capabilities.

There is no current educational offer that balances real, true education with spiritual practices in an affordable and maintainable way.

# What is the solution?

Introduce a sustainable education system where children can co-create, develop and learn lifeskills with relevant abilities to enhance their experience as a lifebeing.

Becoming prepared practically and physically for a wide range of possible life situations
